Summary

Data Analyst with hands-on experience using SQL, Power BI, Excel, and Python to analyze data, build interactive dashboards, and generate actionable insights; analyzed 50K+ records using data cleaning, EDA, SQL, DAX, Power Query, and visualization techniques, and translated findings into financial analyses, business reports, and predictive analytics for real-world projects.

Skills

- **SQL:** MySQL, Joins, Subqueries, CTEs, Window Functions, Aggregate Functions
- **Power BI:** DAX, Power Query, Data Modeling, Interactive Dashboards, KPI Reporting
- **Excel:** Pivot Tables, VLOOKUP/XLOOKUP, Power Query, Conditional Formatting, Dashboards
- **Python:** Pandas, NumPy, Matplotlib, Seaborn, Plotly
- **Analytics:** Data Cleaning, Data Transformation, EDA, Statistical Analysis, Data Visualization

Experience

Associate Analyst

R1 RCM Global Private Limited, Gurugram

Jul 2026 – Present

Healthcare Analytics

- Manage healthcare claim follow-up activities in Epic, reviewing claim information and tracking the status of approximately 20 claims per day.

Machine Learning Intern

Unified Mentor Pvt. Ltd., India

Jan 2026 – Apr 2026

Python, Scikit-learn, Streamlit

- Built an employee attrition prediction model with 88% accuracy using Logistic Regression.
- Developed a Streamlit dashboard to automate employee attrition analysis, contributing to a 30% improvement in employee retention.

Projects

World Layoffs SQL Case Study | *MySQL*

- Performed end-to-end data cleaning, transformation, and exploratory analysis on 2,361 layoff records using MySQL to identify key trends and patterns.
- Applied CTEs, Window Functions, CASE statements, and ranking functions to analyze 2,361 layoff records and generate business insights across companies, industries, and time periods.

U.S. Financial Market Analysis | *Power BI, DAX, Power Query, Python, Power Automate, Google Drive API*

- Built an end-to-end automated data pipeline using Outlook, Power Automate, Google Drive API, Python, and Power BI to process 65,000 records and reduce manual reporting time by 20%.
- Developed Power Query transformations, DAX measures, and interactive dashboards to analyze credit scores, credit mix, payment behaviour, LTV, loans, credit cards, customer segments, and financial trends across 65,000 records.

Customer Churn Analysis | *Python, Pandas, Matplotlib, Seaborn*

- Performed end-to-end exploratory data analysis on an OTT subscription dataset, using Pandas to analyze customer segments, contract types, and subscription behaviour and create 20+ KPIs.
- Created visualizations with Matplotlib and Seaborn and identified a 28.6% overall churn rate, with monthly-contract subscribers at 55.6% versus 8.3% for annual-contract subscribers.

Education

Bachelor of Arts (Hons) English

University of Delhi, New Delhi

Graduated: 2025

CGPA: 6.75 / 10

Certifications

- Microsoft Certified: PL-300 — Power BI
- CampusX — Data Analysis Using Power BI
